Detailed Action

Applicant cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Status of the Application

*Claims 1-19 have been cancelled.
Claims 20-29 are pending in this application.*

If applicant is aware of any prior art or any other co- pending application not already of record, he/she is reminded of his/her duty under 37 CFR 1.56 to disclose the same.

Statutory Basis For Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101, which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 20-29 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-10 of copending Application No. 7,031,562. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

Rejection Obviousness Type Double Patenting, No Secondary Reference

Claims 20- 29 rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-10 of U.S. Patent No. 7,031,562.

Although the conflicting claims are not identical, they are not patentably distinct from each other because claim 1 of USP 7,031,562 mentioned regarding the optical scattering element having different shape such as cylinders, ellipsoids etc. Claim 1 of the instant application would have been obvious to one of ordinary skill in the art to choose one of the shapes as claimed in claim 1 of USP 7,031,562. Besides that all other claims are identical 21-29 of the instant application to claims 2-10 of USP 7,031,562.

Cited prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Young et al (USP NO. 6,684,008) is cited to show a typical photonic input/output device.
